

The image shows a Visual Studio Code editor window with a Python file named `#rock-paper scissor.py`. The code in the editor is as follows:

```
73
74     print()
75     print("\nThanks for playing! 🙌 ")
76     print(".")
77     print("\n")
78
```

The terminal output shows the execution of the script. It prompts the user to play again, then displays a menu of options (1 - Rock, 2 - Paper, 3 - Scissors). The user enters '1', and the program outputs the result: 'User choice is: Rock', 'Now it's Computer's Turn...', 'Computer choice is: Scissors', 'Rock vs Scissors', and '<== User wins! ==>'. It then asks if the user wants to play again.

```
Do you want to play again? (Y/N): y

~~~~~
      choose an option;
~~~~~
1 - Rock
2 - Paper
3 - Scissors
~~~~~
Enter your choice:
Please enter a valid number.

~~~~~
      choose an option;
~~~~~
1 - Rock
2 - Paper
3 - Scissors
~~~~~
Enter your choice: 1

User choice is: Rock
Now it's Computer's Turn...
Computer choice is: Scissors
Rock vs Scissors
<== User wins! ==>

Do you want to play again? (Y/N):
```

The image shows a Visual Studio Code editor window with a Python file named `#rock-paper scissor.py`. The code in the editor is as follows:

```
73
74     print()
75     print("\nThanks for playing! 🎮 ")
76     print(".*50)
77     print("\n")
78
```

The terminal window at the bottom shows the execution of the script. The output is as follows:

```
Do you want to play again? (Y/N): y

~~~~~
      choose an option;
~~~~~
1 - Rock
2 - Paper
3 - Scissors
~~~~~
Enter your choice: 2

User choice is: Paper
Now it's Computer's Turn...
Computer choice is: Paper
Paper vs Paper
<== It's a Tie! ==>

Do you want to play again? (Y/N): y

~~~~~
      choose an option;
~~~~~
1 - Rock
2 - Paper
3 - Scissors
~~~~~
Enter your choice:
Please enter a valid number.
```

The right sidebar shows the Explorer view with a folder named `powerh...` and a file named `Python`.

The image shows a Visual Studio Code editor window with a Python file named `#rock-paper scissor.py` open. The code in the editor is as follows:

```
73
74     print()
75     print("\nThanks for playing! 🙌 ")
76     print(".*50)
77     print("\n")
78
```

Below the editor, the **Terminal** panel is active, showing the command used to run the script and its output:

```
PS C:\Users\tanmay.koli\AppData\Local\Programs\Microsoft VS Code> & "C:\Users\tanmay.koli\AppData\Local\Python\pythoncore-3.14-64\python.exe" "d:/#rock-paper scissor.py"
welcome to Rock-Paper-Scissors!

~~~~~
      winning Rules:
~~~~~
Rock vs Paper -> Paper wins
Rock vs Scissors -> Rock wins
Paper vs Scissors -> Scissors wins
~~~~~

~~~~~
      choose an option;
~~~~~
1 - Rock
2 - Paper
3 - Scissors
~~~~~
Enter your choice: 3

User choice is: Scissors
Now it's Computer's Turn...
Computer choice is: Rock
Scissors vs Rock
<== Computer wins! ==>

Do you want to play again? (Y/N): y
```

The terminal output indicates that the user chose 3 (Scissors) and the computer chose Rock, resulting in a computer win.
